

Muhammedmustapha Abdullahi

Full-Stack Web & Mobile Developer | Founder, UASE Tech Studio Ltd

Abuja, Nigeria · Remote worldwide | uasetechstudio@gmail.com | WhatsApp +234 913 354 9399 | uase.tech | [LinkedIn](#)

PROFILE

Professional full-stack developer since 2020 and founder of a software company: trading under the UASE brand since 2024 and incorporated as **UASE Tech Studio Ltd** in 2026. I take whole products from a client's problem to the App Store, Google Play and production, covering planning, architecture, design, build, testing, launch and ongoing upgrades. Core stack: **Next.js, TypeScript, FastAPI, MongoDB Atlas and Capacitor** (iOS + Android).

Hire me as a developer Full-time or contract, remote. Next.js, FastAPI and cross-platform mobile.	Engage UASE Tech Studio Ltd A complete software team for your product, from design to launch and support. USD payments accepted.
---	--

HIGHLIGHTS

- Built and launched **CARSTRIMS** end to end: a five-role vehicle marketplace, live on the web, the App Store and Google Play.
- Delivered 12+ production systems for healthcare, judiciary, automotive and logistics clients.
- Trained and mentored 150+ students; remote-first, serving clients worldwide.

EXPERIENCE

Founder & Lead Software Engineer — UASE Tech Studio Ltd

Jun 2026 – Present

CAC-registered software company (RC 9594186) · Abuja, Nigeria · Remote worldwide

- Registered UASE Tech Studio Ltd as a stand-alone software company, separate from the enterprise's other businesses, to take on complete software projects for clients worldwide.
- Led **CARSTRIMS** from the client's problem to launch: planning, architecture, design, build, testing and release of a multi-role marketplace (dealer, staff, partner, buyer, super admin) on Next.js, FastAPI and MongoDB Atlas.
- Shipped native iOS and Android apps from one Next.js codebase with Capacitor, including push notifications (FCM V1), real-time messaging, store submission and device-specific fixes.
- Rebuilt the company site, uase.tech, in the same stack: blog, admin dashboard, visitor analytics, contact system and a responsive, mobile-first interface.
- Run training for developers and office teams; serve international clients and accept payments in US dollars.

Founder & Lead Developer — USTY Alhaji Service Enterprise

Jan 2024 – May 2026

CAC-registered business trading under the UASE brand · Abuja, Nigeria

- Moved from working as an individual developer to running a registered business, delivering complete software systems for clients instead of isolated components.
- Delivered systems for healthcare, judiciary, automotive and logistics clients, including **BloodLink** (blood donor platform) and a **Court Order Management System**.
- Implemented a Facade-pattern service layer for scalable email and API management.
- Mentored 150+ students on SIWES and final-year software projects across Nigerian universities.

Independent Full-Stack Developer — Self-employed

2020 – 2024

Nigeria · Remote

- Began professional full-stack development in 2020, after full-stack engineering training at Bro Tech Institute (2018 – 2020), and progressed from small projects to full client systems.
- Built with Django, PostgreSQL, MySQL, PHP, JavaScript and Bootstrap before moving to the Next.js and FastAPI stack.

Technical IT Assistant — Edge Meter / T4U / Sunstar

2021 – 2023

Contract consulting

- Technical documentation and system audits for AY Global Integrated Services; secure data-handling procedures for institutional engineering audits.
- Delivered Solar/Starlink integration projects to close connectivity gaps.

IT Instructor — Heritage Computers / Ligo Computers

2016 – 2020

Zaria, Nigeria

- Trained 150+ students in MS Office, CorelDRAW and UI/UX fundamentals; developed and delivered structured diploma curriculum.
