Diploma in Computing
Heritage Computers, Zaria
EF SET English C1 (68/100)

PROFILE

Full-stack engineer with a 10-year IT background and full-stack development since 2020. I build web apps and cross-platform **iOS and Android** apps on Next.js, TypeScript, FastAPI and MongoDB Atlas, and take products from planning and architecture to the App Store, Google Play and production. Founder of UASE Tech Studio, delivering systems across healthcare, judiciary, automotive and logistics.

FLAGSHIP PROJECT

CARSTRIMS — Vehicle Marketplace (Web · iOS · Android)

Live on the web, the App Store and Google Play · carstrims.com

- Planned, architected, designed, built, tested and launched the whole product end to end for a client.
- Multi-role platform (5 user roles): inventory, sales tracking, financial reports, appointments, QR codes.
- One Next.js codebase shipped as native iOS and Android apps with Capacitor, including store submission.
- Real-time messaging and push notifications (FCM V1); FastAPI + MongoDB Atlas backend on Render, frontend on Vercel.

EXPERIENCE

Founder & Lead Engineer — UASE Tech Studio

2020 – Present · Abuja, Nigeria · Remote / Hybrid

- Architected and delivered 12+ production systems for healthcare, judiciary, automotive and logistics clients.
- Engineered BloodLink, a healthcare platform with automated email workflows, real-time donor matching and admin coordination.
- Implemented a Facade-pattern service layer for scalable email and API management.
- Mentored 150+ students on SIWES and final-year software projects across Nigerian universities.

Technical IT Assistant — Edge Meter / T4U / Sunstar

2021 – 2023 · Contract consulting

- Consulted on technical documentation and system audits for AY Global Integrated Services.
- Designed secure data-handling procedures for institutional engineering audits.
- Delivered Solar/Starlink integration projects to close connectivity gaps.

IT Instructor — Heritage Computers / Ligo Computers

2016 – 2020 · Zaria, Nigeria

- Trained 150+ students in MS Office, CorelDRAW and UI/UX design fundamentals.
- Developed and delivered structured curriculum for computing diploma programmes.

SELECTED PROJECTS

BloodLink — Blood Donor Platform

Next.js · MongoDB · NextAuth · Resend. Connects donors, beneficiaries and admins with automated email and real-time matching.

Court Order Management System

Django · PostgreSQL. Secure platform for issuing and tracking digital court orders.

Food Ordering App

React · Node.js · Capacitor. Multi-vendor platform with real-time tracking, shipped as a native Android app.
